logistics & transportation

Utilize RPA to improve logistics by automating tracking systems for both shipments and vehicles, the checking and reporting shipment of status to the logistics company and customers, and extracting shipment details—in a fraction of the time and with a higher degree of accuracy than your human workforce. Use cases for logistics and transportation include:

- **Shipment scheduling and tracking**
- **Invoice processing**
- **Closing out loads**
- **Automating email communications**
- **Order/Inventory Tracking**
- **Gathering freight bill payment**
- **Resolving payment disputes**
- **Securing proofs of delivery**
- **Automating order processing & payments**
- **On-boarding of customers**
- **Automating the scheduling of appointments**

what uipath rpa can do

Collect and read structured and unstructured data

Reduce manual data entry

Integrate with legacy systems to centralize information
