prebuilt flood certification ordering

The Neostella prebuilt RPA solution for automating the tedious task of ordering flood certifications means that the hours loan officers previously spent clicking through files can now be focused on more analysis and insight.

benefits of our prebuilt flood certification automation:

Our prebuilt UiPath automation features preset libraries for both UIs and APIs **meaning more capabilities depending on your needs and to make adoption seamless.**

Our bots work in the background, so you have peace of mind knowing flood certifications are being generated **while you are concentrating on other tasks.**
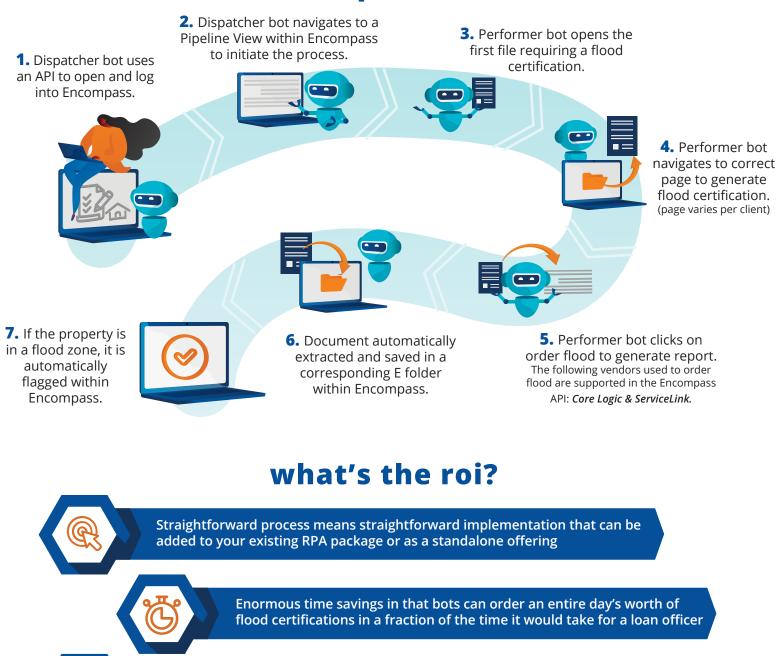

Utilizing Encompass APIs **is quicker, more reliable, and stable.**

enormous **time savings**

eliminates the **risk of delayed closings** resulting from certifications not getting ordered on time

our process

1. Dispatcher bot uses an API to open and log into Encompass.

2. Dispatcher bot navigates to a Pipeline View within Encompass to initiate the process.

3. Performer bot opens the first file requiring a flood certification.

4. Performer bot navigates to correct page to generate flood certification.
(page varies per client)

5. Performer bot clicks on order flood to generate report. The following vendors used to order flood are supported in the Encompass API: *Core Logic & ServiceLink.*

6. Document automatically extracted and saved in a corresponding E folder within Encompass.

7. If the property is in a flood zone, it is automatically flagged within Encompass.

what's the roi?

Straightforward process means straightforward implementation that can be added to your existing RPA package or as a standalone offering

Enormous time savings in that bots can order an entire day's worth of flood certifications in a fraction of the time it would take for a loan officer

We are experts in this area, meaning that we have been able to increase the quality and speed of automation for even greater efficiency
