

## RPA In SAP/Manufacturing:

### *Inbound Goods Receipt To Invoice*

A day in the week of SAP system users involves many different processes. Because of the number of departments involved as well as the repetitive nature of these processes, incorrectly entered information can cause significant delays to the overall product flow. The inbound goods receipt to invoice document **contains important information relating to the inbound delivery process**, such as product, quantity, vendor, and more. UiPath RPA automating the creation of inbound goods receipt to invoices can ensure timely product receipt, accurate data entry, and cost savings.

## Value Of A Streamlined Inbound Delivery Process With Robotic Process Automation

Database-wide integration so that quantities and product location match-up between warehouse and SAP database

Maintaining accuracy for Shipping and Receiving team as well as customer service agents

Reducing human error and potential for company losses

Reducing workload stress on employees due to high volume of deliveries

## Standardization Across Departments

The inbound goods receipt to invoice requires that the Purchase Order and Shipping and Receiving teams work closely together:

Purchase Order for product created by Purchase Order team

Shipping and Receiving team run daily report of shipments expected to arrive

Shipping and Receiving team create inbound delivery

Shipping and Receiving team assign inventory to a specific location

# RPA Automating The Inbound Goods Receipt To Invoice Creation Results In:

Streamlining onboarding

Standardizing the process between Purchase Order and Shipping and Receiving teams, resulting in higher interdepartmental efficiency

Emotional relief on employees, as highly repetitive process can take an emotional toll

## About Neostella

Neostella is a global automation consulting, implementation and custom development firm. We take a customer-centric approach with our automation services and will work closely with your team to identify opportunities for better efficiency, to refine your processes, and to create unique solutions designed to meet your business needs. With office locations in North America, South America, Europe and Asia, our global team offers ongoing 24/7 support, ensuring long-term success after you go live.
